SINGLE SWITCH REPLACEMENT KITS

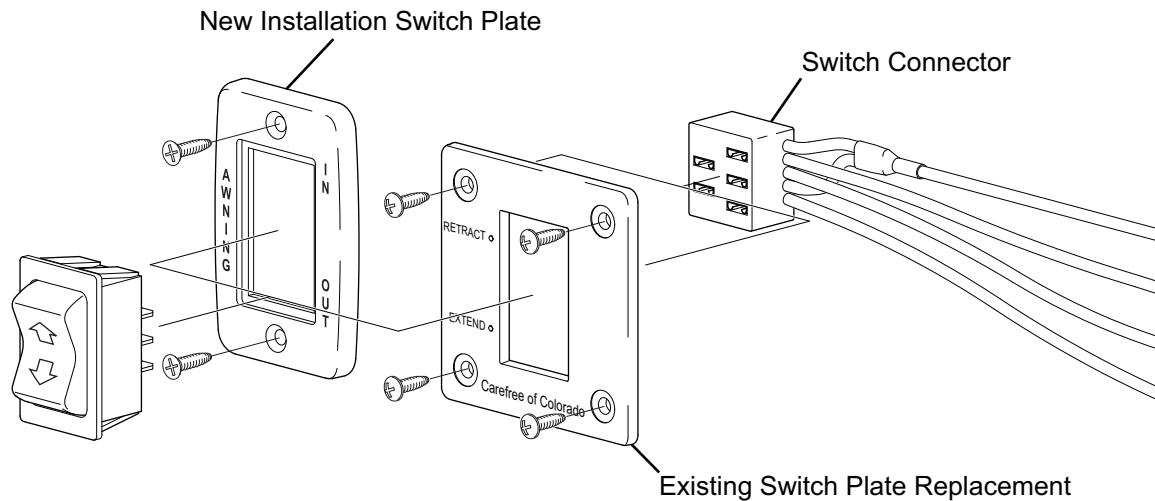

PLEASE FORWARD TO:

Dealer Service

☐ SERVICE MANAGER ☐ WARRANTY MANAGER ☐ PARTS MANAGER

As part of Carefree's continuous product improvement, the single switch used for 12V awning installations has been upgraded.

This new switch is now offered as a replacement switch kit for existing 12V awning installations (p/n R001605).

SK001b

Please Note:

- The new switch has a different shape than the older switches. The kit includes two face plates. The narrow plate is for new installations. The square plate matches the older switch plate in size and can be mounted in the same place as the older switch plate. Please note that the new switch does not fit in the older switch plate.
- Wiring the switch is different than the older switches. Wires from the awning, power and ground are attached to the switch connector. The connector simply plugs onto the back of the switch.
- Installation and wiring details are included with the switch kit.
