# UNIVERSAL ADD-A-WALL WITH PLASTIC ATTACHMENT INSTALLATION INSTRUCTIONS

STEP ONE: Inspect the Add-A-Wall contents. Closely inspect each component found in the kit.

The Carefree Add-A-Wall kit contains:

1- Add-A-Wall Panel 1- Hardware bag Consisting of: 2- Fastsnap Grommet Studs

2- Sheet Metal Screws

**STEP TWO:** Gather tools and supplies TOOLS THAT MAY BE REQUIRED

\*Tape Measure

\* Straight Edge

\* 1/4" Nut Driver

 \* Marking Pen

## STEP THREE: PREPARE ADD-A-WALL FOR INSTALLATION

Zip the side pieces to sides of the Add-A-Wall panels. They go on the sides of the panels that have velcro patches on the privacy panels.

### STEP FOUR: INSTALL ADD-A-WALL

Find the center of the trailer. Place one of the panels on the ceiling with the center zipper in the center of the trailer. Check to see if the Add-A-Wall touches the trailer floor. There should be 1" to 2" on the floor. If not this Add-A-Wall needs to be mounted to the back wall, not the ceiling. Run screws thru the plastic pieces of the Add-A-Wall to secure it. Place a screw on either end of the plastic and screws about 6" apart all the way down the plastic. Do this for both the sides and the top plastic.

Some Add-A-Walls come with areas around their perimeter that have velcro patches. If so there will be adhesive velcro strips provided to secure them as required.

**STEP FIVE:** Mount the Fastsnap grommet studs on the floor using the closest grommet on the bottom of the Add-A-Wall for Fastsnap location.
